

Aastha Saini

Aspiring Product Manager · Builds 0→1 products

your.email@example.com · +91 XXXXX XXXXX
github.com/AASTHA381 · Portfolio · linkedin.com/in/your-handle

MBA candidate and hands-on builder who ships product end-to-end — **research** → **PRD** → **design** → **build** → **deploy**. Shipped **8 live products** across AI, fintech, marketplaces, real-time social and productivity, each with a full PRD (personas, metrics, flows, roadmap). Comfortable turning ambiguous problems into shipped MVPs and measurable outcomes.

AI-native products

Rapid Prototyping

A/B thinking

HTML/CSS/JS

Node.js · Firebase

LLM APIs (Groq)

Data-informed decisions

SELECTED PRODUCTS (SELF-DIRECTED, SHIPPED & LIVE)

SmartCart — AI purchase decision assistant · Node + Groq LLM, PWA Live · PRD · Code

- Built an AI-native tool giving an objective **Buy / Wait / Don't-buy** verdict by reasoning over a user's budget, spending and savings goals — not just price.
- Shipped 3 feature phases: personalisation & dashboard, watchlist with price-drop tracking & 30-day reminders, and product comparison + voice/quick input + share-as-image. Deployed on a Node backend with the API key secured server-side.

TeamMatch — teammate matching for MBA projects · Firebase, real-time PWA Live · PRD · Code

- Designed a two-sided matching engine ranking classmates by **complementary** skills, availability and goals; adopted by a live batch (~146 students).
- Implemented auth + server-enforced ownership and real-time sync; privacy-minimised data model (no sensitive PII).

DayFlow — schedule-aware sleep planner · Firebase + on-device ML, PWA Live · PRD · Code

- Computed an “earliest safe bedtime” from each day's timetable, gym intensity and tasks; added photo-to-dismiss alarms verified **on-device** (TensorFlow.js) for privacy.

YatraYatri — investment planner for a real client · reactive web app Live · PRD · Code

- Turned a trek-tourism founder's brief into a live financial cockpit: 7-category allocation, 0–100 readiness score and real-time risk alerts (emergency fund, HR runway, break-even).

Also shipped · each with a full PRD

- FoodMatch** — Tinder-style group restaurant matcher (serverless real-time, OpenStreetMap data). **LinkVault** — Chrome extension saving links/docs with AI summaries.
- ClassTrack** — attendance tracker surfacing “safe skips left” per subject. **PM Study Planner** — flexible daily planner with streaks, grids & heatmap.

EDUCATION

MBA, NMIMS · specialising in Product / Marketing
Relevant: Product Strategy, Consumer Behaviour, AI for Managers, Analytics

WHAT I BRING

0→1 ownership · ships fast & pragmatically · writes crisp PRDs · reasons with metrics · strong AI-product instinct.
